

TREVISO TRANSITIONAL CARE IS PROUD TO OFFER OUTPATIENT REHABILITATION

Treviso Transitional Care is excited to announce our Outpatient Therapy Program, separate from our In-Patient Therapy Program.

Our rehabilitation team provides quality physical, occupational, and speech therapy services to our patients, with a customized plan of care developed for each individual.

We are committed to patient care on every level, with the ultimate outcome of successful rehabilitation or self-management of your condition.

Our goal is to help you create a stronger, healthier future by equipping you with the strength and skills to manage your condition and care for yourself.

Some of the conditions which usually require therapy include:

- Knee replacements
- Strokes
- Hip replacements
- Heart surgeries
- Shoulder replacements
- Rotator cuff surgeries
- Brain surgeries
- Vital Stim
- Early onset dementia
- Parkinson's disease
- Orthopedic care
- Therapeutic modality pain management
- Home exercise training
- Dysphagia and dysarthria treatment
- Amputee support
- Cardiac rehab
- Cognitive rehab
- Vestibular and balance rehab

Please call us today to schedule a private tour and learn more about our comprehensive rehabilitation services.

Outpatient therapy services are provided by appointment Monday – Saturday.

Separate Outpatient Therapy Entrance and Parking.
